Profile

I am a highly motivated and progress driven software developer interested in all things technology. I am looking forward to bringing value and collaborating with new developers.

Projects

ReactMedia

A react site that allows users to search movies and tv shows. User authentication is available, this allows various functionalities, such as rating, and adding movies/tv shows to favorites, watchlist and user specific lists.
http://tiny.cc/reactmedia

Fit-In:

A fitness site that uses bootstrap, sass, and webpack. Bootstrap provides the main styling and layout, while sass is used to override and customize. The naming convention and file structure is from the BEM methodology and is compiled into a production build using webpack.
http://tiny.cc/fit-in

Game Show App:

A website game that tests the user's skill to correctly guess the letters of a phrase. However, if the user guesses the wrong letters 5 times, they lose. Game Show App uses HTML, CSS and Javascript.
